

# ANTAL JÁNOS MONORI

COMPUTER SCIENCE AND ENGINEERING. MOBILE DEVELOPMENT.

## Summary

I like to spend time at hackathons and working on personal projects. I like the notion of open-source software and I take pride in the code that I produce. Taking initiatives and responsibility is part of my personality. Exploring new places and cultures is a hobby of mine.

## Working Experience

**Software Developer @ LEGO**  
2017 jan - present, Billund, DK

Part of the core Android team working on important consumer facing mobile projects. Assuming ownership of internal mobile SDKs and the mobile continuous integration pipeline for Android.

### Achievements:

- **Lead technical developer** on LEGO TV for Android TV and Fire TV, assuming project management roles and overseeing 2 ext. developers contributing to the project
- Part of the team **delivering the Android version of LEGO Life** for mobile and tablet in 26+ markets with over +3m downloads, ~500k MAO and ~4\* rating on average
- Implemented a **mobile continuous delivery platform** for Android with a containerized setup orchestrated by GitLab CI and fastlane
- **Developing, maintaining and releasing SDKs** facing our services like LEGO ID, Adobe Analytics and other internal services

**Student Developer @ LEGO**  
2013 aug - 2017 jan, Billund, DK

Assumed multiple roles over the years in the frontend-, backend- and infrastructure teams. Later part of new mobile development team focusing on native consumer-facing apps.

### Achievements:

- Part of the core team **developing the beta version of LEGO Life**, launched in the UK
- **Delivered LEGO All Stars Movie Maker** for tablet and phone, with +100k downloads
- Part of the team **maintaining LEGO 3D Catalogue AR app** based on Vuforia and a shared C codebase with native frontend
- **Delivered a general-purpose continuous delivery platform** based on ElectricFlow and Perforce catering for ~150 developers
- **Closed defects on websites** with millions of daily visits like lego.com/en-us/starwars

## Education
